WHY For 60 years, we have been fulfilling our mission to improve individual family and community well-being in Greater Waukesha County thanks to strong partnerships and quality services that address urgent local needs.

The pervasive youth mental health crisis and levels of anxiety, depression and trauma in our families and communities have grown to levels that cannot be ignored. Family Service's success is built upon trust and supportive relationships with community leaders, businesses, and socially responsible people like you who share our desire for all people in need to receive prompt, equitable, affordable, compassionate mental health care and for children and families to be safe from violence and abuse.

All proceeds from this event will directly benefit individuals and families who turn to Family Service for life-changing care.
